

# CHAKIR NISRINE

## FULL-STACK DEVELOPER

📍 Lot El Ouafaa Nr 32, Temara ✉ nisrinechakir237@gmail.com ☎ +212652370332

### SUMMARY

A motivated software engineering student with a strong technical foundation, eager to apply my development skills and knowledge to innovative projects. Enthusiastic and detail-oriented, I thrive on solving complex problems and contributing to impactful solutions. Seeking an end of year internship. (PFE)

### LANGUAGES

Arabic ( Fluent )  
English( Fluent )  
French ( Intermediate )

### EDUCATION

<b>HIGHER NORMAL SCHOOL OF TECHNICAL EDUCATION (ENSET) - MOHAMMEDIA</b>	<b>2023 - 2026</b>
Degree in Software Engineering & Distributed Systems	
<b>HIGHER SCHOOL OF TECHNOLOGY (EST) - SALÉ</b>	<b>2021 - 2023</b>
University Diploma in Software Engineering	
<b>SALMANE EL FARISSI - TÉMARA</b>	<b>2019 - 2021</b>
Baccalaureate in Physics and Chemistry	

### SKILLS

**Languages :** Java | JavaScript | HTML | CSS | Nodejs | Python | C | C++ | PHP | Kotlin | Dart | PERL | XML | XSL

**Frameworks :** Laravel | VueJS | React | Angular | Flutter | Jetpack Compose | SpringBoot | CodeIgniter | TailwindCSS

**Databases :** MySQL | SQLite | SQL Oracle | NoSQL | MongoDB | Redis

**Tools and technologies :** JavaFX | Git | GitHub | Docker | Figma | Jira | RestAPI | J2EE | MultiThreading | Visual Studio

**Operating Systems :** Linux | Windows | RedHat | Ubuntu

### EXPERIENCE

<b>IDSG - Casablanca</b>	June - August 2025
Backend Developer Designed and developed a full-featured REST API using Spring Boot, followed by comprehensive API documentation. Containerized the application with Docker and managed its deployment and hosting using Coolify for streamlined server management.	
<b>MTDS - Rabat Agdal</b>	June - July 2024
Full Stack Developer Developed a platform that was executed through a full lifecycle, from initial analysis and design to development and deployment. The solution was developed with Laravel and TailwindCSS, followed by Mysql integration and deployment via cPanel.	
<b>MTDS - Rabat Agdal</b>	April - June 2023
Full Stack Developer Created a project that followed a structured lifecycle from requirements analysis and database design to full-stack development. The solution was built using Bootstrap for the front-end and CodeIgniter 4 for the back-end.	
<b>Casnet - Hay Riad</b>	June - July 2022
Frontend Developer Designed and developed responsive, cross-browser compatible web interfaces optimized for all devices. Leveraged Microsoft 365 (including Power BI for data-driven insights) and collaborated closely with cross-functional teams to implement user-friendly and visually appealing UI/UX designs.	

### PROJETS PERSONNELLES

PFE - Medical Appointment System. Developed web platform with Vue.js frontend and Laravel API backend  
PFA - IoT Equipment Monitoring. Created Flutter dashboard with ML integration for real-time failure detection for industrial machinery.
